

Code Review Guidelines

The code review guidelines stated in [How To Create Code Review Guidelines](#) and [Code Review Checklist – To Perform Effective Code Reviews](#) will be adopted as the review guidelines for code review. The following practices will also be adopted:

- Build and Test before Review
- Provide positive feedback
- Include all team members in the review process
- Automate as much as possible
- Check acceptance tests

Style Guidelines

We will make use of the following existing style guides

- [JavaScript Standard Style](#)
- [Google JavaScript Style Guide](#)
